

RCMA WIMAUMA COMMUNITY ACADEMY

CASE STUDY

CASE STUDY SUMMARY

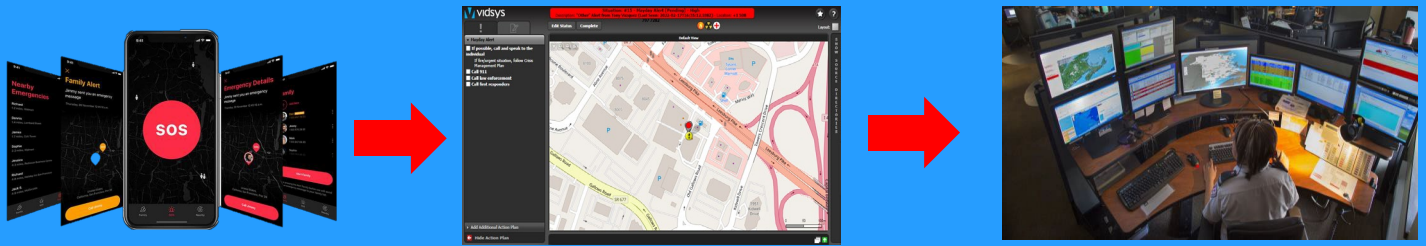

Mayday Safety is a comprehensive 2-way communication and alerting system that enables anyone, anywhere to quickly and effectively respond to any emergency. Mayday Safety ranges from a free mobile application for friends & family and an all-inclusive safety and security system for any organization.

OBJECTIVE

RCMA Wimauma Community Academy, located in Florida, selected the Mayday Safety solution to enhance the school capabilities to improve school safety and security while also meeting the requirements of Alyssa's Law.

SOLUTION

When an alert is triggered a mass notification is sent to all users, a phone call is placed to connect the alerting user with law enforcement or a designated dispatch agency.

Integrated site information (floor plans, cameras, access control, etc.) is automatically shared with any responders.

Mayday Safety also works simultaneously with pre-existing security and safety systems to provide immediate alerts to any risk event, then communicate critical data in a concise and effective way.

RESULTS

The comprehensive Mayday communication and alerting system provides clarity during the chaos of an emergency event to help save lives. Mark Haggett, Principal of RCMA Wimauma Community Academy stated, "Our school is proud to utilize Mayday Safety and relieved to know that we can quickly activate a comprehensive response and communicate with law enforcement using the Mayday application. Our key staff from bus drivers to teachers are equipped to activate an alert and communicate with both administrators and first responders whenever necessary."
